Sammons Financial® is the marketing name for Sammons® Financial Group, Inc.'s member companies, including Midland National® Life Insurance Company. Annuities and life insurance are issued by, and product guarantees are solely the responsibility of, Midland National Life Insurance Company.

Declared rates are based on current rates and are subject to change without notice.

Projected illustrated rates: Projected illustrated rates are based on the annual effective rates for the most recent, most favorable, and least favorable ten year period out of the last twenty years of historical index performance as taken from our current illustration for this product. The projected illustrated rates in this hypothetical example assume the index will repeat historical performance and that the annuity's current non-guaranteed elements, such as index caps, index margins, participation rates or other interest crediting adjustments, will not change. It is likely that the index will not repeat historical performance, the non-guaranteed elements will change, and actual rates will be higher or lower than those provided in this example but will not be less than the minimum guarantees.

Withdrawals taken prior to age 59 1/2 may be subject to IRS penalties.

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from your accumulation value for additional optional benefit riders or strategy fees associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

This index is managed to a volatility target, and as a result the index performance will not match the performance of any other index or the markets in general since volatility control tends to reduce both the rate of negative performance and positive performance of the underlying index, thereby creating more stabilized performance. The S&P MARC 5% ER Index has been in existence since Mar. 27, 2017. Ending Values in years prior to inception are determined by S&P Dow Jones Indices LLC or its affiliates ("SPDJI") using the same methodology as used currently.

The Index tracks the return of the weighted ETFs and any Cash Constituent, above the sum of the Return on the Interest Rate and the Index Fee. It is important to note your premium is not invested in the Index but in the insurance company's general account, which may include investments that do not follow the environmental, social, and governance (ESG) practices of the BlackRock ESG US 5% Index ER.
